city game

May, 29th - August, 31st, 2024

Lufcik

ON THE TRAIL
OF CLEAN AIR

city game

Each of us wants to be healthy and live long and happily. Is it difficult to achieve? It depends. To be healthy, we must breathe healthily. How to do it when the air in the Silesian Voivodeship is not among the best? Clean air and water are our common concern - that's clear. But there are no shortcuts. To breathe clean air and enjoy good quality water, we need many changes. First and foremost, we must understand that this is a serious problem. Not everyone realizes that by throwing a plastic bottle into the furnace, they are poisoning themselves, their families, and neighbors. On the map, places where tasks and puzzles are hidden are marked. Each correct solution brings participants closer to solving the main password. In the search for answers to the most pressing questions regarding air protection, participants will be accompanied by the Śląsk family: mom Anita, dad Michał, daughter Julka, son Antek, and grandfather Krzysztof, characters known throughout the voivodeship from the educational-information campaign. The guide on this extraordinary adventure will be Lufcik - a very nice parrot, a symbol of the Silesian Voivodeship's fight for clean air.
