

The Second Life of Packaging

“The Second Life of Packaging” Workshop

When: 1 June 2025, 16:00 - 19:00

Where: Osiedle Dąbrowa w Krzepicach, ul. Wyspiańskiego, 42-160 Krzepice

Who: Joanna Grzyb, eco-manager of the Municipality of Krzepice

The Children's Day celebration in Osiedle Dąbrowa, Krzepice, is an annual event that attracts local residents with various outdoor activities. For the third time, the eco-zone within the LIFE "Silesia. Blue Sky Restored" project will be part of this special day, offering creative workshops and educational initiatives focused on environmental protection.

Upcycling Workshop: Salt Lanterns from Jars

This year, attendees will take part in the upcycling workshop "The Second Life of Packaging – Salt Lanterns from Jars". The activity will demonstrate how everyday waste can be transformed into functional and decorative objects, showing that discarded materials are valuable resources rather than useless trash. This hands-on experience is not just a fun craft session, but also a lesson in circular economy, where waste is repurposed rather than discarded.

Recycling in Fashion: Exhibition of Upcycled Headwear

At the eco-manager's booth, visitors can explore a post-competition exhibition showcasing recycled headwear designed by participants of the "Don't Burn It – Design It! Contest for an Eco-Friendly Headpiece". This initiative raises awareness of the impact of waste burning on air quality while proving that fashion and sustainability can go hand in hand.

The event will also address the environmental impact of the fashion industry, focusing on textile overproduction and the consequences of improper disposal. The exhibition and workshops will highlight the importance of mindful shopping and responsible consumption, which help reduce waste and minimize pollution.

Practical Support for Residents

Adult attendees will have the opportunity to receive advice from an eco-manager on funding options for energy-efficient solutions, choosing eco-friendly heating systems, home insulation, and renewable energy installations. By combining environmental education with practical guidance, the event supports residents in making sustainable choices that enhance energy efficiency and air quality.

Why Join?

"The Second Life of Packaging" is a creative and educational experience that promotes recycling, upcycling, and sustainable consumption. It also provides a platform for discussions on everyday actions that contribute to a cleaner environment and a functioning circular economy.

This event is organized as part of the LIFE project "Silesia. Blue Sky Restored."

I invite you
Joanna Grzyb
