

**MEP candidates: Stand Up 4 Water!**  
**Will you put water and WASH higher up on the European political agenda?**

Join us at our booth held during EU Green Week to learn more about the [Stand Up 4 Water manifesto](#) and its pledge.

Around the world, millions of people lack access to safe drinking water and adequate sanitation facilities. The consequences of this crisis are dire, leading to preventable deaths, poor health outcomes, and hindering socio-economic progress.

The Stand Up for Water campaign—made up of a coalition of NGOs across Europe—is calling on the next European Parliament to address the water crisis.

We must acknowledge that water security is fundamental to an inclusive and climate-resilient future, critical to tackling the global challenges of health threats, and integral to food and energy security.

This is coming at a time where water stress has never been more salient in Europe and beyond, with the need to deliver climate-resilient water access becoming more pressing for the most underserved.

**[MEP candidates: Will you stand up for water?](#)**

We are asking candidates to the European elections to read our manifesto for water and support:

- 1) Making water resilience a political priority on the EU agenda
- 2) Supporting investments in the water, sanitation and hygiene sector
- 3) Highlighting the link between water access and other sustainable development goals

**Make water resilience a political priority on the EU agenda**

Future MEPs: Please take political leadership in speaking up about the importance of access to safe water, sanitation, and hygiene in Europe and beyond.
