# “Climate Change. What Can We Do in Our City to Face the Future?”

Panels for the Young Generation

Integrated LIFE project “Silesia: Blue Sky Restored”. Comprehensive implementation of the Air Quality Plan for the Silesian Voivodeship. LIFE20 IPE/PL/000007 - LIFE-IP AQP-SILESIA-SKY

## “Climate Change. What Can We Do in Our City to Face the Future?” Panels for the Young Generation

**When:** 1–19 June 2026, 10:00 – 13:00

**Where:** Primary School No. 16 with Integration Classes named after Maria Konopnicka,  
ul. Osińska 50, 44-240 Żory

**Host:** mgr **Joanna Łyżwa**, Head of Primary School No. 16,  
**Joanna Szerzyńska-Grabowska**, eco-manager of the Żory Municipality

*The initiative is an official EU Green Week Partner Event.*

How do climate changes affect the functioning of modern cities and what can we do to better prepare for the challenges of the future? During the educational panel “Climate Change. What Can We Do in Our City to Face the Future?” primary school students will have the opportunity to reflect together on how cities can respond to the impacts of climate change and what actions help create more resilient and environmentally friendly urban spaces.

The meetings will take place in primary schools in Żory and will combine a presentation with a discussion panel. This format will allow students not only to learn the basic facts about climate change but also to actively participate in a conversation about the future of their cities.

During the session, participants will learn how climate change affects the urban environment. Topics such as heat waves, heavy rainfall and flooding, deteriorating air quality and the increasing frequency of extreme weather events will be discussed. Students will also explore examples of actions cities can take to reduce the impacts of these changes.

Special attention will be given to urban climate adaptation measures, including the development of green infrastructure, the creation of new green areas, improving the energy efficiency of buildings, expanding environmentally friendly transport systems and managing water and energy resources responsibly.

The panel will also demonstrate that climate action is closely linked with the functioning of the modern economy. Investments in green technologies, the development of renewable energy sources and the implementation of circular economy principles are becoming key elements in building modern cities that combine economic growth with environmental protection.

The event aims to strengthen the environmental awareness of the younger generation and show that students themselves can influence the future of their cities through everyday decisions, responsible choices and active engagement in environmental actions.

**The event is organised as part of the project “Silesia. Blue Sky Restored”.**
