GREEN  
WEEK

# Circular Economy and Green Jobs

Online Talk  
Tuesday 24 June 11.00 a.m.

The circular economy and the new opportunities offered by the so-called “green economy” are essential to overcome the economic and ecological crisis we are experiencing. Renewable energy, building, transport, agriculture, tourism, food production, communication, finance, waste management and land safety... The list is very long, and it shows that every productive sector is affected.

All this generates new jobs and allows the requalification of many profiles which do no longer find correspondence in the employment market: but what are the green skills that are increasingly in demand today and the tools giving concrete support to job seekers, to those people who want to change job or to those who have lost it and want to reinvent themselves in the green?

All these topics will be discussed and addressed during the workshop Circular Economy and Green Jobs organized by the Italian Institute for Environmental Protection and Research – ISPRA as a stage of Facciamo Circolare/2 campaign, created in collaboration with and with the funding of MIMIT – Ministry of Enterprises and Made in Italy.

This event has received from the European Commission the label of Partner Event of the EU Green Week 2025 focused on Circular Economy: reuse, repair, recycle for a better life.

Circular Economy and Green Jobs Talk will be a lively and interactive moment of dialogue and discussion between institutions, businesses, associations, universities and experts on the issues.

#### Interventions:

- **Maria Siclari** – ISPRA Director General
