

Water resilience with eu projects

Together we amplify our impact for a
sustainable future

 THURSDAY 30 MAY 10.30H ONLINE

INTRODUCTION

The LIFE ECOdigestion 2.0 project is a clear example of how we can add innovation for greater water resilience in Europe. **To achieve maximum impact and obtain stronger solutions, it is essential to approach and generate synergies with other European projects** that pursue and are aligned with the same or similar objectives. This is how we join in this Green Week event with an online event that favours the creation of opportunities thanks to the exposure and conversation with other water and/or energy innovation driver projects.

AGENDA DESCRIPTION

The agenda for our event will be divided into **two main parts**. Firstly, we will present the projects and initiatives undertaken by LIFE ECOdigestion 2.0, showcasing our efforts in promoting water resilience through cutting-edge technologies and practices. This presentation will offer insights into our work and demonstrate the impact we aim to achieve.

Following the project presentations, the second part of the event will focus on generating conversations and addressing questions from the attendees. This interactive session aims to engage participants in discussions about water resilience, encouraging the exchange of ideas, experiences, and best practices. Our diverse audience, including policymakers, researchers, industry professionals, and civil society representatives, will contribute to enriching these discussions with their unique perspectives and expertise.

The event will feature keynote speeches from renowned experts in the field, providing valuable insights into the latest developments and challenges related to water resilience. Additionally, panel discussions and interactive workshops will offer opportunities for deeper exploration of specific topics and practical solutions.

Moderators: *Lola Bordás (CMO, Fundación Finnova) / Adrián Noheda (Project Manager, Fundación Finnova)*

• **10:30 - 10:45** Welcome and Introduction

Speaker: Juanma Revuelta, CEO Finnova Foundation

Overview: Introduction to the LIFE ECOdigestion 2.0 project, its goals, and the impact on sustainable water management.

• **10:45 - 11:15** Project Partners Presentations

Global Omnium, Carlos Lafita, R&D Technician

Aguas do Centro Litoral , Sandra Jorge, R&D and Innovation Coordinator

Finnova Foundation, Adrián Noheda, Project EU Manager

• **11:30 - 12:15** Roundtable: Synergies and LIFE Project Presentations

Participants:

Biogas NET, Xavier Gamisans, Project Coordinator - TBC

Venpralab, Angela Ventura, CEO - TBC

LIFE 3E, [Speaker Name] - TBC

LIFE Infusión, [Speaker Name] - TBC

Discussion: Exploring synergies among various LIFE projects, focusing on environmental sustainability, energy efficiency, and innovative solutions in water management.

12:15 - 12:30 Closing Remarks

Speakers: Juanma Revuelta and Moderators

Summary: Final thoughts, how to get involved, and next steps for LIFE ECOdigestion 2.0 and partner projects.
