ECO-PICNIC

July, 28th, 2024

1. ul. Miechowska 4
42-439 Żarnowiec

Throughout the Days of Żarnowiec, the Eco-Manager leads educational activities, quizzes, and games for children and families. These engaging sessions cover topics such as air pollution, waste segregation, and renewable energy sources, empowering attendees with knowledge and actionable insights. At the Eco-Manager's booth, visitors receive personalized consultations and learn about available funding opportunities, fostering collaboration and innovation in environmental initiatives. Moreover, discussions about the anti-smog resolution underscore the importance of collective action in combatting environmental challenges.

The Ecopiknik also features workshops and discussions focused on water and air protection. Participants will delve into the importance of preserving these vital resources, exploring topics such as water conservation, air quality improvement, and the impact of pollution on ecosystems. Through interactive demonstrations and informative sessions led by environmental experts, attendees will gain a deeper understanding of the challenges facing our water and air systems and learn practical strategies for mitigating environmental harm. By fostering dialogue and awareness around these critical issues, the event empowers individuals to become stewards of our planet's precious natural resources.
