

EcoSphere: Creating Eco-Friendly Decorations

Ecosphere: Creating Eco-Friendly Decorations

When: 14 June 2025, 16:00 - 19:00

Where: Podłęża Królewskie 19, 42-161 Podłęża Królewskie

Who: Joanna Grzyb, eco-manager of the Municipality of Krzepice

During the Feast of St. Anthony and Children's Day in Podłęża Królewskie, ecology meets creativity! As part of the Ecosphere initiative within the "Silesia. Blue Sky Restored" project, we invite participants to engage in the "Creating Eco-Friendly Decorations" workshop, where they will learn how to transform everyday waste into stylish, functional home decorations. Additionally, an interactive quiz on the circular economy will be held, with eco-friendly prizes for participants.

Upcycling Workshop: From Jars to Minimalist Vases

Participants will learn how simple materials—old jars and twine—can be creatively repurposed into elegant vases. The workshop highlights the benefits of upcycling and demonstrates how giving new life to discarded objects contributes to waste reduction and a circular economy. The hands-on activity aims to inspire creativity while encouraging sustainable choices in everyday life.

Circular Economy Quiz

Following the workshop, attendees can participate in a quiz covering key topics related to waste management and sustainability, including:

- Which materials can be effectively recycled?
- What is upcycling, and why is it beneficial?
- How can household items be repurposed instead of discarded?
- How does recycling impact air quality and reduce pollution?

Each correct answer earns participants an eco-friendly reward, motivating them to engage with the topic and apply their knowledge to real-life sustainability efforts.

Eco-Advisory Point

Adults will have the opportunity to visit an eco-advisory stand, where they can receive information on:

- Available grants and funding opportunities for eco-friendly home improvements
- Choosing an efficient heating system to reduce emissions
- Thermal modernization strategies for energy efficiency and cost savings
- Renewable energy solutions (RES), such as solar panels and heat pumps

Understanding how energy efficiency and heating choices impact air quality is crucial for making informed decisions that contribute to a healthier environment.

Why Join the Event?

This event offers a practical approach to the circular economy, demonstrating that sustainability can be both simple and creative. By learning new skills, engaging in eco-friendly practices, and gaining insights from experts, participants will be encouraged to make small yet impactful changes in their daily lives.

This event is organized as part of the LIFE project "Silesia. Blue Sky Restored."

*I invite you
