# RIVER OF KNOWLEDGE

Literary Cycle  
on Sustainable Water Use

May, 30th, - September, 30th, 2024  
Żory

In the preschools of Żory, a literary cycle on sustainable water use titled "River of Knowledge" will take place. Children will have the opportunity to explore various books that emphasize the importance of caring for water ecosystems and utilizing water resources in a sustainable manner.

Preschoolers from 13 institutions in Żory will listen to diverse stories and fairy tales aimed at promoting a conscious approach to water resource management. Through interactive reading sessions and educational games, children will learn about the significance of water conservation, responsible usage, and the impact of human actions on the natural environment. Additionally, artistic workshops are planned, where children will express their thoughts on water conservation by creating drawings and collages.

The aim is to educate children about sustainable water use through literature and play. By engaging in child-friendly literature and artistic activities, we aim to enhance the awareness of the youngest members of our community and inspire them to take action to protect the natural environment.

This event also aims to promote a conscious approach to water resource management and increase society's resilience to water scarcity and droughts.
