

Water in the Built Environment Navigating Challenges Towards a Resilient Future

Tue 11 June (or Wed 12 June / Thu 13 June)

13.00-13.10 (UTC+1) Welcome, opening words
Reijo Kuivamäki, Director, AFRY Market Segment Water

13.10-13.30 Water optimisation for industry
Eduardo De Almeida, Manager, AFRY Process Industries (or to be decided)

This presentation will discuss strategies for optimizing water usage in industrial processes, with a focus on sustainable practices.

13.30-13.45 Climate change adaptation
Dr Terhi Renko, Head of New Business, AFRY Infrastructure

This presentation will explore the challenges posed by climate change and the measures that can be taken to adapt to its impacts.

14.00-14.15 Biodiversity impacts & dependencies
Sven von Vittorelli, Senior Consultant, AFRY MCD Sustainability (or to be decided)

This presentation will discuss the relationship between water management and biodiversity, and the importance of considering the impacts and dependencies of water usage on local ecosystems.

14.15-14.30 Water as a financial risk
Dr. Minna Pirilä, Head of Strategic Business Development, AFRY Infrastructure

This presentation will explore the financial risks associated with water management, and the importance of considering water as a financial asset in decision-making.

14.30-14.45 Conclusions and ending words – to be decided

Draft 15 Mar 2024
