

Malopolska Green Week 2024: We save water!

When: June 3-7, 2024

Place: the area of the entire Małopolska Province

[Climate and environmental advisors in 21 Małopolska counties](#)

One elementary school lesson on water conservation (21 counties x 1 lesson x 20 people). Total of more than 400 children.

June 3-7, 2024

[Meetings with high school students as part of the Małopolska Education Cloud.](#)

June 3-7, 2024

1. Monday, June 3

Generally about water - water resources in the world, drinking water - Poland vs. Europe, types of water, protection, etc.

2. Wednesday, June 5

Sustainable water management- water management in daily life, saving at home, at work, at school, etc.

3. Friday, June 7

Impact of climate change on the water cycle: discuss how climate change affects water cycles, precipitation and groundwater levels. Outline the consequences of these changes on drinking water availability, agriculture, ecosystems and community life, as well as climate/water migration of animals and humans.

[The conference "Aqua in Futurum: Innovations and Strategies for a Sustainable Water World" on June 4 or 6](#)
