14:30 – Closing Session

Summary of key takeaways, final remarks, and official closure of the event.

C-Sustain and the GreenWeek

The EU Green Week 2026 and the C-SUSTAIN project are strongly connected through their shared values and core principles.

EU Green Week 2026 promotes key ideas such as sustainability, protection of nature, and the transition to a circular and inclusive economy. These principles form the foundation of European environmental policy.

C-SUSTAIN directly reflects these same values by empowering young people with the skills and knowledge needed to create sustainable businesses and solutions. Through training in circular economy and green entrepreneurship, the project puts into practice the priorities highlighted during Green Week.

In this way, C-SUSTAIN embodies the values of EU Green Week, turning its environmental and social principles into real actions led by the next generation.
