

## Green Mission in Poręba Field Game

Integrated LIFE project "Silesia. Blue Sky Restored". Comprehensive implementation of the Air Quality Plan for the Silesian Voivodeship. LIFE20 IPE/PL/000007 - LIFE-IP AQP-SILESIA-SKY

## Field Game “Green Mission in Poręba”

**When:** 26 June 2026, 15:00 – 19:00

**Where:** Agora Miejska, Przemysłowa 19a, 42-480 Poręba

**Host:** Ewelina Matyja, eco-manager of the Poręba Municipality

*The initiative is an official EU Green Week Partner Event.*

Can you become a Guardian of Nature by solving riddles and completing ecological missions across the city? During the field game “Green Mission in Poręba”, participants will discover that environmental protection can be an exciting adventure combining movement, teamwork and learning about nature.

The Municipal Agora in Poręba will serve as the starting point of this unique expedition, where participants will set out on a green mission. Teams will move across a designated area, completing a series of tasks related to environmental protection, clean air and everyday choices that influence nature. Along the route, participants will encounter ecological challenges, puzzles and activities that require observation, creativity and cooperation.

During the game, participants will learn how local actions can support the environment. The tasks will address topics such as the role of greenery in cities, ways to reduce air pollution, protection of natural resources and responsible energy use. Through this engaging format, participants will discover that investing in nature begins with knowledge and the everyday decisions made by residents.

The game has an open and intergenerational character. Families with children, school groups, groups of friends and residents interested in spending time actively outdoors are all welcome to participate. The event encourages the integration of the local community and invites participants to rediscover the urban space from a new, nature-oriented perspective.

“Green Mission in Poręba” combines fun, education and physical activity. Participants develop teamwork skills, orientation in the field and creative problem-solving abilities while gaining knowledge about the environment and how to protect it.

The event demonstrates that investing in nature also means investing in clean air, public health and the future of the local community. Every participant can become part of this mission – all it takes is curiosity, willingness to act and the desire to explore nature together.

**The event is organised as part of the project “Silesia. Blue Sky Restored”.**
