

EU Green Week 2024

Towards a water resilient Europe

LIFE INFUSION WEBINAR:

Innovative solutions for a water-resilient Europe

31st May 2024 | Online

10:00 WELCOME | AMB

Revolutionary Water and Circular Economy Projects: From waste to resources

Three Life projects related to regenerated water and circular economy will explain how innovation is essential to move forward to a greener future. One of them will be the Life Infusion project, which will highlight the use in horticulture of effluents from household separated organic waste: reuse of water and fertilizers.

11:15 Short break

Building Sustainable Communities: Inspiring local and regional success stories

Three local and regional entities will show their experiences raising awareness around water scarcity and making their territory more water resilient.

12:45 CLOSING | AMB
