

DRAFT AGENDA:

TransformAr Open Day – City of Lappeenranta

Date: August 29th, 2024

Location: Lappeenranta City Hall, Villimiehenkatu 1, 53101 Lappeenranta

Duration: from 10 AM to 5 PM

Topic: Open field day in the city of Lappeenranta on 29th August. The objective is to showcase climate resilience solutions and activities implemented in the Green Deal TransformAr project. Solutions and activities include a range of measures to enhance natural management of stormwater and the involvement of citizens. Open Day is organized as a part of the annual Greenreality Carnival.

At the Carnival event, from 10 AM to 5 PM, there will be a presentation stand where we will share information about the TransformAr project and present the climate change adaptation tools implemented.

We will also present the citizen science project, give advice on how to use the water sample test kit and how to take samples. There will be test kits available for distribution at the stand.

During the day, guided tours will be held in the recently completed stormwater treatment area at Koulukatu 29-31. Invitations will be sent to nearby schools and the media in advance, and passers-by will be encouraged to visit the site. The tours will take place every hour.

The name of speakers will be specified later. At our stand, it will be possible to meet representatives of the city and LUT University involved in the project.
